Project Structure

app/

```
---- assets/           // svg icons and css
---- bower_components/  // angular, angular material
---- dist/             // views and js-files
---- src/              // typescript and tsconfig.json
---- index.html

typings/              // definitions from tsd
.bowerrc              // bower configuration
bower.json
```

Overview

CodePen Community

Install Angular Material

- npm, jspm and bower

Setup TypeScript

Serve Application

Bootstrap Application

Summary

CodePen Community

Installed node

- npm install -g typescript bower live-server

Installed Angular Material

- bower install angular-material --save

Setup TypeScript

Bootstrapped the Application
